LEADERSHIP EXPERIENCE

Institutional Leadership

2021-present Vice Dean for Clinical Investigation, Johns Hopkins University School of Medicine

- Responsible for strategic planning and oversight of School of Medicine clinical research ecosystem, reporting to the Dean
- Supervise three Senior Associate/Associate Deans and 180 employees supporting clinical research and regulatory infrastructure
- Oversee the Institutional Review Board and Human Research Participant Protection Program, Office of Clinical Trials, and Investigational Drug Service
- Oversee the Institute for Clinical and Translational Research (Clinical and Translational Science Award) and partner with University of Maryland leadership for Clinical and Translational Science Award
- Serve as Institutional Official for the Johns Hopkins Medicine Institutional Review Boards and leader of the Johns Hopkins Medicine Human Research Participant Protection Program including the School of Nursing and delegated responsibility for the Johns Hopkins Health System
 - Responsible for broad oversight of accredited Human Research Protections Program including 12,000 study protocols, management of non-compliance, and regulatory and ethical issues relating to the conduct of safe and high-quality human subjects research
- Lead strategic efforts across the research ecosystem to facilitate discovery
 - Launched Office of Clinical Trials focusing on commercial clinical research to bring services supporting industry-related studies together for enhanced faculty support. Deployed a study start-up program successfully accelerating commercial trial initiation timelines.
 - Initiated Johns Hopkins University Investigational Drugs and Devices policy providing university-wide regulatory requirements and Johns Hopkins Investigational New Drug and Device Program providing researcher support
 - Improved IRB customer-service orientation including implementing consult service to make protocol planning and submission easier. Focus includes AI research.
 - Implemented modern clinical trials management system, investigator study dashboard, and public-facing clinical trials search portal with new Health IT partnership
- Lead Johns Hopkins University-wide initiative to create and deploy a Johns Hopkins Medicine de-identified electronic health record dataset with 8 million patients and 190 million clinical notes to catalyze discovery, enrich education and improve clinical care. Emphasis on ease of access while ensuring data privacy, compliance, and honoring community trust. Data resource accessible across Johns Hopkins University for faculty, staff and trainees.
- Co-lead strategic efforts to ensure strength of Johns Hopkins Medicine research with changes in federal funding landscape including research resiliency programs, evaluation of and plans for research programs and cores, and strategies to safeguard the research investigator pipeline

- Facilitate discovery across the basic science through clinical research continuum through close engagement with Vice Deans, department leaders, institutional administrators including co-leading School of Medicine Research Council
- Serve in Dean's executive leadership team with Vice Deans, Finance, and Communications guiding strategic initiatives and advising on range of decisions affecting the School's clinical, educational and research programs including investments and resource allocation
- Contribute as active member of University and Johns Hopkins Medicine committees representing the clinical research ecosystem e.g., University Research Oversight Committee, University Institutional Compliance Committee, Johns Hopkins Medicine AI and Data Trust Council

2019 –present Co-Director, Johns Hopkins School of Medicine Research Council

- Direct group with membership including research faculty leadership from each School of Medicine department as well as key stakeholders e.g., Office of Research Administration, Johns Hopkins Technology Ventures, Office of Research Integrity
- Lead strategic discussions critical for the research community including investments in new technologies and cores, setting priorities for research across the School
- Committee evaluates cores' effectiveness for optimal resource allocation
- Solicit feedback from departments and faculty on decreasing barriers to research, led to solutions including accelerating commercial trial timelines
- Responsible for planning, implementing and communicating laboratory and clinical research reopening plans during COVID-19

2020 –2021 Vice Chair Clinical and Translational Research, Johns Hopkins University School of Medicine Department of Medicine.

- Oversaw clinical research for this Department with 18 divisions, 650 faculty and total external research portfolio of 191 million dollars.
- Guided strategic research efforts including collaboration and synergy between basic science and clinical research.
- Responsible for COVID-19-related research response including preparation for research shutdown and successful reopening of clinical and laboratory research in the Department.
- Conducted restructuring of sponsored grants management program including listening tour with all current staff, new organizational plan, establishing a new senior staff position, and improving work flows for pre- and post-grants administration with 47 employees.
- Led the Department's Research Council to provide a forum for two-way communication between the departmental/school research leadership and research faculty including representatives from each division in the Department, and basic science and clinical research.
- Actively participated in the professional development of research faculty including orientation of new appointees, advice on the promotion process, grant pre-review and finding mentors.

2016 - 2020 Inaugural Research Director, Division of General Internal Medicine. Johns Hopkins University School of Medicine - Department of Medicine.

- Responsible for facilitating research across the Division with 25 million dollars in external grant funding including improving infrastructure for scholarly activity and supporting research career development for 80 faculty
- Responsible for hiring and supervising pre- and post-grant award grants management team within the Division including training, monitoring, communication with faculty and quality improvement
- Supported the Clinician-Educator Mentorship and Scholarship Program and led efforts to connect clinicians, clinician-educators and clinician scientists for synergy and career development opportunities
- Created development of online process for faculty to share personnel and non-personnel resources and online repository dedicated to research resources
- Organized monthly Divisional research grand rounds

- Participated in faculty review activities, met with and mentored faculty individually to support their scholarship and link them to resources for their research
- Served on Department of Medicine Research Council

2013 - 2016 Associate Director, Welch Center for Prevention, Epidemiology and Clinical Research. Johns Hopkins University Schools of Medicine and Bloomberg School of Public Health

- Responsible for working to support, and with Director, lead this research unit of 30 faculty, 100 trainees and 100 staff, with 35 million dollars in annual external research funding. The mission is to improve population health by conducting rigorous research that integrates clinical medicine with public health expertise, and training the next generation of interdisciplinary researchers and scholars.
- Planned and co-led faculty retreats and 25th Anniversary Symposium and Celebration.
- Provided guidance and informal mentorship to junior faculty.
- Led successful Search Committee and recruitment of three faculty members in Cardiovascular Epidemiology
- Developed strategic plan and philanthropic material for fundraising efforts
- Worked closely with Director on day-to-day Center operations and strategy including space and resource allocation, represented Director for Departmental leadership activities
- Led website re-design

Educational Program Building/Leadership

- 2016 -present Co-Director, Johns Hopkin Doris Duke Early Clinician Investigator Award Program. In this program funded by the Doris Duke Foundation and matched by School of Medicine funds, we provide financial and mentoring resources for 1-2 years to junior physician scientists who are working to have a productive career while caring for family members including children, partners or parents. Includes convening and leading a grant review committee and advisory committee and contributing to a national program evaluation. I participate in national meetings with program leaders from other institutions. Represented Johns Hopkins at National Academies of Science, Engineering and Medicine Supporting Family Caregivers in STEMM National Symposium 11/25.
- 2016 -2021 Co-Director, Johns Hopkins School of Medicine Clinician Scientist Award Program
I co-led this program that provides junior faculty with internal funding of \$75,000 per year for two years before obtaining a mentored NIH award. I convened and led a multidisciplinary convening and grant review committee.
- 2014 -present Leader, K to R Transition Program, Institute for Clinical and Translational Research. In this role, I developed and lead a school-wide program to assist early-stage investigators with mentored research funding to progress to independent federal funding. We have monthly seminars, host “speed” specific aims review sessions, provide mentoring and connection with research resources, and track outcomes for K-awardees.
- 2013 - 2017 Co-Director, Department of Mental Health Course, “The Intersection of Mental and Physical Health,” Johns Hopkins School of Public Health, Department of Mental Health. Co-developed the curriculum for new seminar course.
- 2010 - 2012 Associate Director, Pre-Doctoral Clinical Research Training Program, Institute for Clinical and Translational Research, Johns Hopkins University School of Medicine. In this role I had ongoing responsibility for interacting with medical and nursing student trainees both for the year-long research and summer research short-term experiences. As part of this responsibility in co-leading an educational component of the Institute for Clinical and Translational Research, I participated in candidate selection and monthly programming for the Pre-Doctoral Clinical Research Training Program.
- 2006 - 2012 Co-Director, Epidemiology Curriculum Development and Clinical Epidemiology Horizontal Strand and Johns Hopkins University School of Medicine Curriculum Reform Committee member, In this

role, I planned and directed the new course content for Epidemiology in the Genes to Society curriculum for first-year medical students and worked to ensure the incorporation of Epidemiology across the new curriculum. I recruited and organized faculty speakers and lab instructors for the course.

Additional Institutional Leadership

2007 – 2011, 2018- 2021	Member, Johns Hopkins University School of Medicine Institutional Review Board Expedited Committee
2011 - 2018	Co-Chair, Johns Hopkins University School of Medicine Institutional Review Board Expedited Committee
2014 - 2015	Chair, Search Committee for Faculty Candidates in Cardiovascular Epidemiology, Department of Epidemiology
2014 -present	Member, Johns Hopkins Medicine Research Council
2014 - 2022	Member, Office of Faculty Development Senior Advisory Council
2014 - 2018	Elected Member, Johns Hopkins University School of Medicine Faculty Senate
2016	Search Committee Member, Chair of Health Policy and Management, Bloomberg School of Public Health
2016 - 2017	Search Committee Member, Chair of Psychiatry and Behavioral Sciences, Johns Hopkins University School of Medicine
2023-2024	Co-Chair Search Committee, Chair of Department of Pediatrics, Johns Hopkins University School of Medicine
2024 -present	Sponsor, Levi Watkins Jr Mentorship program. Promote professional growth and increase the retention of high performing and high potential leaders. The program aims to support next generation career development, creating opportunity for greater exposure of hidden talent, and exploration of career aspirations.

Current Grants

- 08/15/18 – 04/30/29 Center to Accelerate Translation of Interventions to Decrease Premature Mortality in SMI
2P50MH115842
National Institute of Mental Health
\$1,563,965
Role: PI, 30%; The Center studies implementation strategies to scale-up effective interventions to address cardiovascular risk behaviors (unhealthy diet, physical inactivity, tobacco smoking) and risk factors (obesity, hypertension, diabetes and dyslipidemia) among persons with SMI, with an explicit focus on partner engagement, methods innovations, and building capacity amongst researchers and community partners to enact our Center's mission – so that persons with SMI can live long healthy lives.
- 09/01/23-08/31/27 Reducing Disparities in Cardiovascular Health in Community Mental Health Settings:
Optimizing Implementation Strategies
UH3HL154280
National Heart, Lung, and Blood Institute
\$970,700
Role: PI (multiple PI), 20%; This study leverages national expertise in cardiovascular risk reduction interventions, implementation science, and community and State policymaking to enhance uptake of evidence-based interventions to prevent cardiovascular disease among persons with serious mental illness, through strong community partnerships that are enhanced using novel implementation science strategies.
- 05/15/24-04/30/31 Johns Hopkins Institute for Clinical and Translational Research
1UM1TR004926-01
National Institute of Health/National Center for Advancing Translational Sciences
\$6,500,002
PI: Ford
Role: co-Investigator 2%
The Johns Hopkins Institute for Clinical and Translational Research (ICTR) is dedicated to creating a regional translational research Hub with University of Maryland Baltimore, Kennedy-Krieger Institute, Morgan State University and Kaiser Permanent MidAtlantic as our partners. The goal is to use the principles of translational science to bring innovative ideas to interventions that improve the health of Maryland. We have a comprehensive model for supporting translational research that includes support for training, a comprehensive set of clinical research resources, innovative use of informatics and partnership with patient and the local communities.
- 07/01/24-06/30/28 Johns Hopkins University Trial Innovation Center
U24TR004440
National Institute of Health/National Center for Advancing Translational Sciences
\$24,594,078
PI: Hanley
Role: Co-Investigator, 2.5%; The scientific purpose is to demonstrate that TIC innovations in trial design, execution, and evaluation can lead to better trial performance, including faster start-up, faster completion, greater protocol compliance and more precise endpoints.

12/16/24-10/31/29	Integrating Medicare and Medicaid for dual eligibles with serious mental illness: studying healthcare utilization, quality, and mortality 1R01MH139215-01 National Institute of Health \$850,462 PI: McGinty (Cornell University), Stuart (Johns Hopkins University) Role: Co-Investigator, 10% This study will aim to fill the gap of dual-eligible special needs plans using novel linked data capturing the entirety of Medicare and Medicaid services for 100% of dual eligibles with SMI nationally. We will use a rigorous concurrent-embedded mixed-methods approach integrating quantitative trial emulation methods with qualitative study of dual-eligible special needs plans implementation. The quantitative Aims will examine changes in outcomes among dual eligibles with SMI who switched from other Medicare coverage options to integrated dual eligible special needs plans when an integrated dual-eligible special needs plans became newly available in their county, relative to changes in outcomes over the same period among matched dual eligibles with SMI in counties without an integrated dual-eligible special needs plans.
4/15/25-9/30/25	Real-World Effectiveness and Economics of Semaglutide and Tirzepatide versus Metformin for Antipsychotic-Induced Weight Gain Johns Hopkins HBHI \$5,000 PI: Chao and Slade Role: Co-I, 0% The primary aim of this study is to characterize the weight loss effectiveness of metformin vs GLP-1 RA (semaglutide or tirzepatide) among adults taking antipsychotic medications using a real-world, big data analysis.

Role: Co-Investigator, 5%

- 09/01/10 - 08/31/12 Mobile Phone Interactive Technology for Weight Loss: A Pilot Study in Persons with Serious Mental Illness
Brain and Behavior Research Foundation (NARSAD)
Independent Investigator Award
\$100,000
Role: PI, 8%; We will develop and test a cell-phone based weight loss technology for persons with serious mental illness.
- 03/01/08 - 11/30/14 Randomized Trial of Achieving Healthy Lifestyles in Psych Rehabilitation
R01MH080964
National Institute of Mental Health
\$4,976,262
Role: PI, 30%; This randomized trial in psychiatric rehabilitation centers will test a practical weight-loss intervention with nutrition counseling and exercise classes tailored to persons with serious mental illness.
- 08/22/11 - 11/30/14 Randomized Trial of Achieving Healthy Lifestyles in Psych Rehabilitation
R01MH080964-S1
National Institute of Mental Health
\$204,308
Role: PI, 10%; This competitive revision will utilize the Randomized Trial of Achieving Healthy Lifestyles in Psychiatric Rehabilitation (ACHIEVE) as a platform to examine potential disparities between African Americans and Whites with serious mental illness in CVD risk, clinical trial involvement, mediators and outcomes.
- 09/26/13 - 09/30/15 Statewide Implementation of Health Homes for SMI: Building Research Infrastructure
R24 MH102822
National Institute of Mental Health
\$342,377
Role: PI, 15%; Maryland's health home will coordinate for medical and mental health care under the Affordable Care Act. In this study we will: 1) study primary care quality for persons with serious mental illness; 2) assess stakeholders' needs for improved primary care and health home plans; and 3) provide technical assistance for a learning collaborative and train health home staff to collect research quality clinical measurements.
- 01/18/12 - 12/31/16 Developing and Translating Interventions to Decrease Mortality Disparities in Serious Mental Illness
K24MH093763
National Institute of Mental Health
\$830,175
Role: PI, 50%; This project supports a general internist and researcher with a longstanding commitment to improving physical health in serious mental illness in her efforts to gain new knowledge in implementation research methods and apply these techniques to implement sustainable strategies to decrease health disparities in serious mental illness while providing outstanding mentorship for junior investigators.
- 08/15/12 - 05/31/19 Trial of Comprehensive CVD Risk Reduction in Persons with Serious Mental Illness
R01HL112299
National Heart, Lung and Blood Institute
\$4,476,595

Role: PI, 15%; This is a randomized trial in psychiatric rehabilitation programs to test a practical, comprehensive cardiovascular risk reduction program where an interventionist will work with participants on heart healthy behaviors and coordinate treatment of risk factors with primary care. If successful, the intervention will be a model program that could be disseminated widely and should reduce health disparities in cardiovascular disease risk in persons with serious mental illness.

- 07/01/18 - 06/30/19 Understanding Disparities in Cancer Screening Among Adults with Serious Mental Illness
Department of Health and Mental Hygiene
\$75,000
Role: Co-PI, 7%; The objective of this project is to understand prevalence of screening for cervical, breast, colorectal and prostate cancer among adults with SMI in Maryland and national samples as well as assess health care providers' perceptions of barriers and facilitators of cancer screening for persons with SMI.
- 08/11/14 - 06/30/20 Trial of Integrated Smoking Cessation, Exercise and Weight Management in SMI
R01MH104553
National Institute of Mental Health
\$3,415,515
Role: PI (multiple PI), 15%; This randomized trial embedded in community mental health programs will test a practical smoking cessation program integrating weight management counseling, exercise and text messaging support.
- 08/05/16 - 04/30/21 Randomized Trial of a Healthy Weight Intervention for Youth with Serious Mental Emotional Disturbance
R01MH110968
National Institute of Mental Health
\$3,000,015
Role: PI, 15%; The objective of this project is to design and rigorously test an innovative, scalable healthy weight intervention in youth with serious emotional disturbance that incorporates parental engagement and support.
- 05/15/21-12/31/21 Community Engagement Research Alliance (CEAL) Against COVID-19 Disparities
35-312-0217571-66398
Research Triangle Institute
\$801,360
Role: Co-Investigator, 2%; Communities and Universities Engaged to Fight COVID-19 (CUE COVID-19), a multi-community and multi-university consortium, including Johns Hopkins University (JHU), Howard University (HU), University of Maryland Baltimore (UMB), Morgan State University (MSU), and George Washington University (GWU), each with multiple community partners in the Maryland-Washington DC metro area.
- 09/28/15 - 08/31/22 Comparative Effectiveness of Health System vs. Multilevel Interventions to Reduce Hypertension Disparities
UH3HL130688-05
National Institute of Health/PCORI
\$12,228,149
Role: Co-Investigator, 2.5%; This pragmatic cluster RCT compares effectiveness of standard care plus audit, feedback and education to collaborative care team, CHW, and specialist consultation to deliver stepped care for reducing HTN disparities.
- 09/10/20 - 08/31/23 Achieving Cardiovascular Health Equity in Community Mental Health: Optimizing Implementation Strategies
UG3HL154280

National Heart, Lung, and Blood Institute
\$3,424,122

Role: PI (multiple PI), 20%; This study leverages national expertise in cardiovascular risk reduction interventions, implementation science, and policymaking to enhance uptake of evidence-based interventions to prevent CVD among persons with SMI, through strong community partnerships that are enhanced using novel implementation science strategies.

01/01/16 - 12/31/23

Fund to Retain Clinical Scientists
Doris Duke Charitable Foundation/ Johns Hopkins Doris Duke
\$583,200

Role: Co-PI, 8%; The program is an important mechanism for junior faculty to continue successful research trajectories during demanding caregiving years. We provide a comprehensive support program that integrates supplemental resources with guidance for career development, research support, and mentoring.

05/31/19 - 05/14/24

Johns Hopkins Institute for Clinical and Translational Research
UL1TR003098-05
National Center for Advancing Translational Sciences
\$8,325,628

Role: Co-Investigator, 10%; Leader of K to R transition program. This CTSA grant supports clinical and translational research throughout JHU including education and training of new investigators, facilities, and patient recruitment, informatics, biostatistics, and translational cores.

Training grant participation

Mentor, T32DK062707, Clinical Research and Epidemiology in Diabetes and Endocrinology, PI Todd Brown

Core Faculty, T32MH014592, Psychiatric Epidemiology Training Program, PI Heather Volk
